PROFESSIONAL SUMMARY

Software Engineer with hands-on experience developing scalable full-stack applications using Python, React.js, FastAPI, Node.js, and REST APIs. Strong foundation in Object-Oriented Programming, Data Structures & Algorithms, database design, and cloud deployment with a passion for building reliable software solutions. Experienced in developing AI-powered applications while following clean coding practices and collaborative software development workflows

EDUCATION

Bachelor of Technology in CSE, Kamala Institute of Technology & Science 11/2022 – 05/2026

TECHNICAL SKILLS

- **Programming** — Python, JavaScript, SQL, C
- **AI & ML** — Machine Learning, TensorFlow, Scikit-learn, Pandas, NumPy, Explainable AI (SHAP)
- **Backend** — FastAPI, Flask, Node.js, Express.js, REST APIs
- **Frontend** — React.js, HTML5, CSS3, JavaScript
- **Databases & Tools** — MongoDB, MySQL, GitHub, Postman, VS Code
- **Cloud & Deployment** — AWS, Microsoft Azure, Vercel, Netlify
- **Core Concepts** — Object-Oriented Programming, Data Structures & Algorithms, DBMS

PROJECTS

Campus Care - Complaint Management System (MERN Stack) 12/2025 – 02/2025

- Developed a full-stack complaint management system using React.js, Node.js, Express.js, MongoDB, and REST APIs with JWT authentication and role-based access control.
- Designed secure backend APIs and efficient database schemas for complaint submission, tracking, escalation, and resolution. 03/2025 – 06/2025
- Built responsive dashboards and integrated email notifications to improve communication and application usability.

Smart Predict - AI powered multi disease diagnostic Platform 09/2025 – 01/2026

- Developed an AI-powered healthcare application using Python, TensorFlow, Scikit-learn, Flask, and React.js for multi-disease prediction.
- Performed data preprocessing and feature engineering using Pandas and integrated machine learning models through REST APIs.
- Implemented Explainable AI (SHAP), interactive dashboards, and scalable backend services for real-time healthcare insights.

AI Money Mentor - AI Powered Financial Intelligence System 03/2026 – 05/2026

- Developed an AI-powered financial assistant using Python, FastAPI, LLM APIs, and Prompt Engineering to generate personalized financial recommendations.
- Built intelligent AI workflows integrating Large Language Models, REST APIs, and structured financial datasets for contextual decision support.
- Processed financial data using Pandas, designed scalable backend services, and developed modular architecture for future Retrieval-Augmented Generation (RAG) integration.

CERTIFICATIONS

- Microsoft Azure Internship Emerging Technologies - Microsoft Learn
- Data Science Virtual Internship - Altair
- Generative AI Virtual Internship - AWS Academy
- Python Fullstack Development Internship - Eduskills Academy

Achievements & Activities

National Service Scheme (NSS) Volunteer

2023 – 2026

Recognized for consistent participation in community outreach programs, social awareness campaigns, and volunteer service initiatives.
