PROFESSIONAL SUMMARY

Software Engineer with hands-on experience developing scalable full-stack applications using Python, React.js, FastAPI, Node.js, and REST APIs. Strong foundation in Object-Oriented Programming, Data Structures & Algorithms, database design, and cloud deployment with a passion for building reliable software solutions. Experienced in developing AI-powered applications while following clean coding practices and collaborative software development workflows

EDUCATION

Bachelor of Technology in CSE, Kamala Institute of Technology & Science

11/2022 – 05/2026

TECHNICAL SKILLS

- **Programming** — Programming — Python, JavaScript, SQL, C
- **AI & ML** — Machine Learning, TensorFlow, Scikit-learn, Pandas, NumPy, Explainable AI (SHAP)
- **Backend** — FastAPI, Flask, Node.js, Express.js, REST APIs
- **Databases** — SQL, MySQL, MongoDB, Database Testing
- **Programming** — Python, JavaScript, SQL
- **Tools** — Postman, Git, GitHub, VS Code
- **Core Concepts** — Object-Oriented Programming, Data Structures & Algorithms, DBMS, Debugging, SDLC
- **Frontend** — React.js, HTML5, CSS3, JavaScrip

PROJECTS

Campus Care - Campus Complaint Management System

03/2025 – 07/2025

- Developed and validated a full-stack complaint management application using React.js, Node.js, Express.js, MongoDB, and REST APIs with JWT authentication and role-based access control.
- Tested authentication, complaint workflows, CRUD operations, API responses, input validation, and role-based scenarios using Postman.
- Debugged frontend, backend, and database issues and verified end-to-end workflows for reliable application behavior.

Smart Predict - multi disease diagnostic Platform

09/2025 – 01/2026

- Developed and validated Python/Flask REST APIs for multiple machine-learning prediction workflows.
- Tested request validation, API responses, model-inference workflows, and frontend-backend integration using Postman.
- Debugged application and API issues and verified prediction workflows across different input scenarios.

AI Money Mentor - AI Powered Financial Intelligence System

03/2026 – 05/2026

- Developed backend services using Python and FastAPI for financial analysis, authentication, and recommendation workflows.
- Tested REST endpoints, authentication flows, request/response handling, and database interactions to ensure reliable application behavior.
- Debugged API and backend issues and validated end-to-end financial workflows using structured test scenarios.

CERTIFICATIONS

- Python Fullstack Development Internship - Eduskills Academy
- Microsoft Azure Emerging Technologies - Microsoft Learn
- Software Development Engineer Internship - Bluestock
- TCS iON Career Edge

Achievements & Activities

National Service Scheme (NSS) Volunteer

2023 – 2026

Recognized for consistent participation in community outreach programs, social awareness campaigns, and volunteer service initiatives
